WORK EXPERIENCE

Data Engineer

Expedia Group

📅 2020 - current

📍 Bellevue, WA

- Led performance tuning initiatives that optimized queries to yield a **53% improvement in data processing speed**.
- Complied with GDPR data privacy regulations by implementing data security measures such as access controls.
- Collaborated with product managers to integrate data engineering into the Expedia platform, enhancing data connectivity by 34%.
- Reviewed code to adhere to data engineering standards and optimize the performance of data pipelines.

Data Engineer

Tableau Software

📅 2017 - 2020

📍 Seattle, WA

- Developed scalable data pipelines and ETL processes, using Python to process large datasets with a daily volume of 10 TB.
- Designed data models for efficient storage that reduced duplication by 21%.
- Implemented governance processes to ensure data integrity, which led to a 96% accuracy rate.
- Implemented monitoring systems to proactively address data quality issues, **reducing anomalies by 36%**.

Data Analyst

Starbucks Corporation

📅 2015 - 2017

📍 Seattle, WA

- Analyzed large datasets with SQL to identify trends and draw insights, resulting in a **29% increase in operational efficiency**.
- Maintained Tableau dashboards to visualize metrics and improve decision-making at the store and regional levels.
- Applied statistical modeling to predict sales performance and optimize inventory, leading to 24% fewer stock outs.
- Conducted A/B testing on marketing campaigns to evaluate their impact, resulting in a 14% increase in customer loyalty.

CAREER OBJECTIVE

Experienced data engineer seeking a role at Zillow to deliver scalable solutions using my Azure expertise. Focused on optimizing data workflows, streamlining processes, and maximizing data quality, my objective is to contribute to Zillow's mission of connecting every individual to their dream home.

EDUCATION

Bachelor of Science

Data Science

University of Washington
